

Group work on assignment 3

Chris Potts, Ling 390a: Controlling the Discourse, Fall 2007

Oct 19

Procedure

Step 1 In the space below, provide one question for your group members to answer. The question can be about anything — the task, the data, the dependent and independent variables, etc.

Step 2 Pass the assignment you're holding and its associated sheet to your right.

Step 3 Look over your group member's assignment and answer his or her question about the experimental design.

Step 4 Return to step 2, repeating until everyone has seen every assignment.

My question for the group
