What are some of the similarities and differences that you can see between modern invertebrates and ancient fossil invertebrates?

Draw a picture of an ancient environment:

N. The Hall of Minerals and Crystals and Meteorites:

Define Meteor:

Meteoroid:

Meteorite:

What are the different types of meteorites that have been found?

Name and describe two minerals or crystals that you found most impressive.

O. The Track Room or Appleton Cabinet:

In 1835 sidewalks of Greenfield, Ma were being installed. The material for these walkways was a flat sandy shale from a Turners Falls quarry. The townspeople noticed what they believed were turkey tracks in the stone. A young doctor, James Deane, thought more of these tracks and contacted Professor Edward Hitchcock of Amherst College. Hitchcock spent the next
